

# UL-891 Energy Solutions For Any Application

## Designing a perfect solution

Electronic Power Design is ready to help with the perfect solution for any complex power application you may have.

Our UL-891 **DFS™** and **iDFS™** switchboards are built to last and feature design innovations that make these products easier to manufacture, install and maintain.

These low-voltage switchboards are readily available to meet the needs of contractors, consultants, and end-users.

### We offer:

Coordination of all-in-one units, for building out new spaces

Individual system components for reconfiguring existing spaces

A local service team and technical support

### DFS™

Well-suited for larger building power distribution needs.

Excellent choice for space-restricted projects - controls and distribution combined.

### iDFS™

# Applications

DFS™

Schools

Hospitals

Water Treatment

iDFS™

Food and Beverage

Retail

Cryptocurrency
